ZINNOV ZONES FOR RPA PLATFORMS

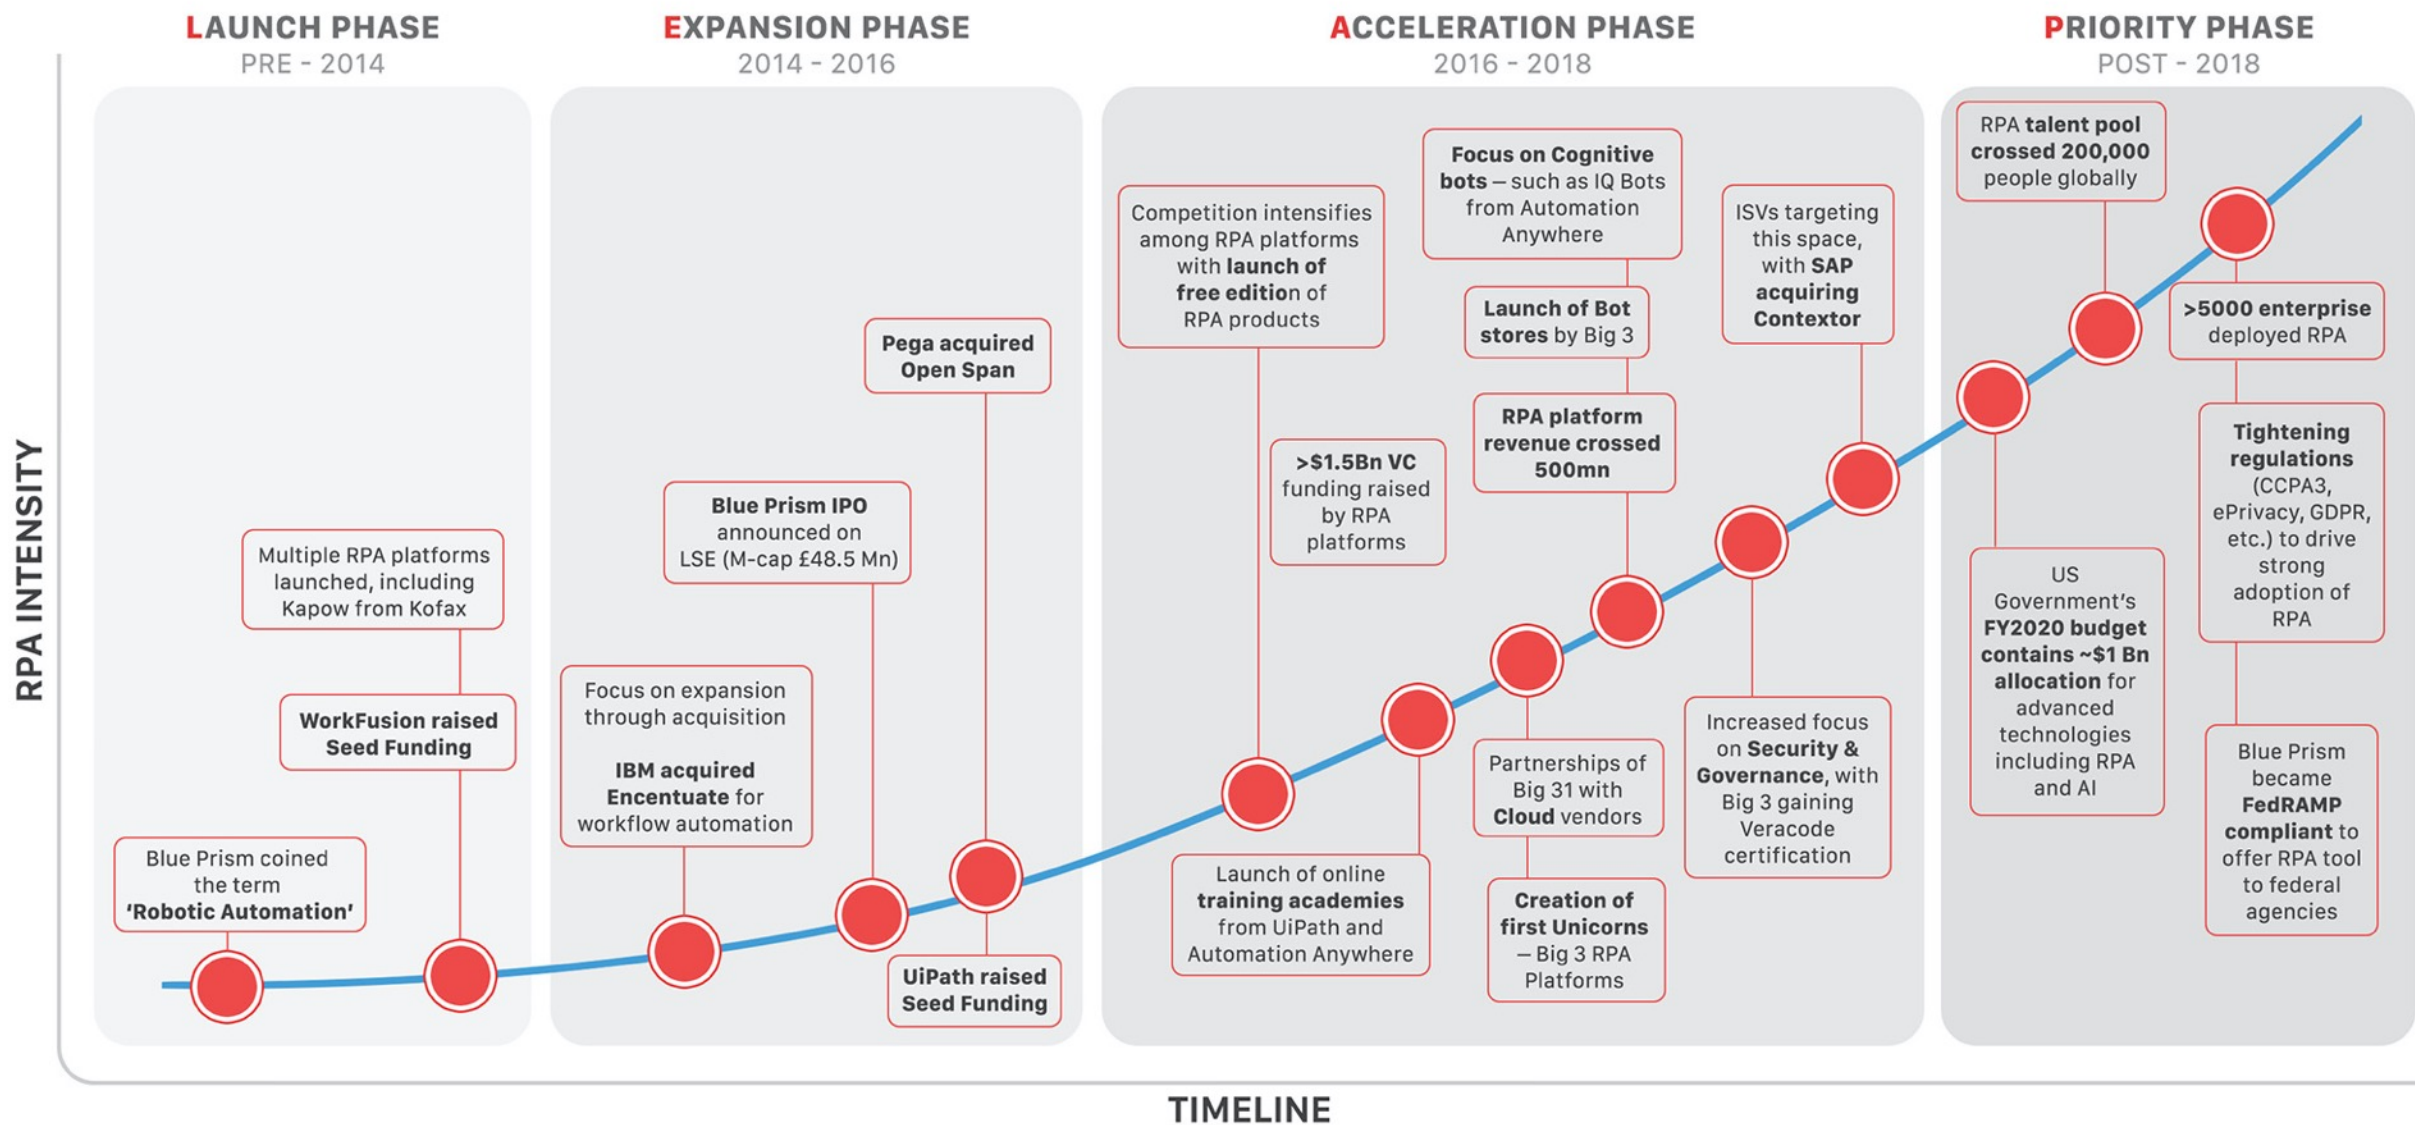

FOCUS ON WORKFUSION

JUNE 2019

ZINNOV PROPRIETARY & CONFIDENTIAL. RESTRICTED ACCESS

Key moments of RPA Evolution : The **LEAP** of RPA

Notes: 1. Big 3 refer to UiPath, Blue Prism and Automation Anywhere; 2. Federal Risk and Authorization Management Program; 3. California Consumer Privacy Act

Source: Zinnov Research and Analysis

2019: Key RPA Trends

ROBOTIC PROCESS AUTOMATION

A \$50 Bn
Juggernaut

1

COGNITIVE RPA

Shaping the
Future of Work

2

HYBRID RPA

Where Attended
Meets Unattended

3

RPA START-UPS

Next RPA Unicorn,
Please stand Up

4

NATIVE RPA

Are the ISVs
Ready

5

TECH GIANTS

The Elephant
in the Room

6

DISTRIBUTED DECISION MAKING

A Unified
RPA Approach

7

SECURITY & GOVERNANCE

The RPA
Secret Sauce

8

DEVELOPER ECOSYSTEM

Addressing the
(Massive) Skill Gap

9

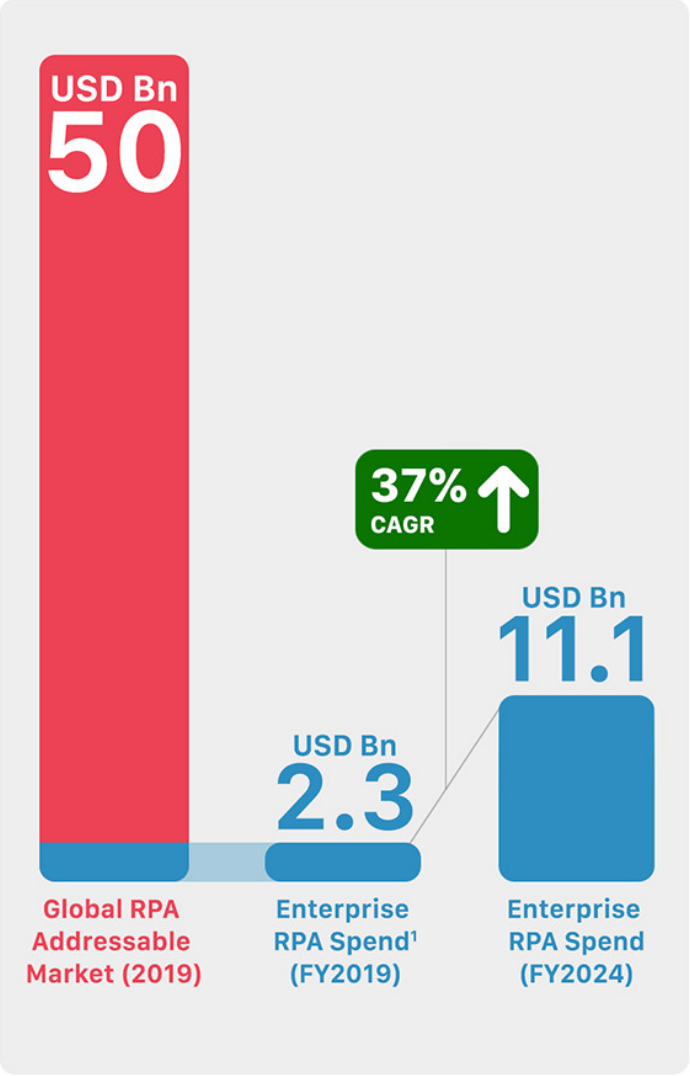

RPA ACCELERATION

A Community-based
Approach

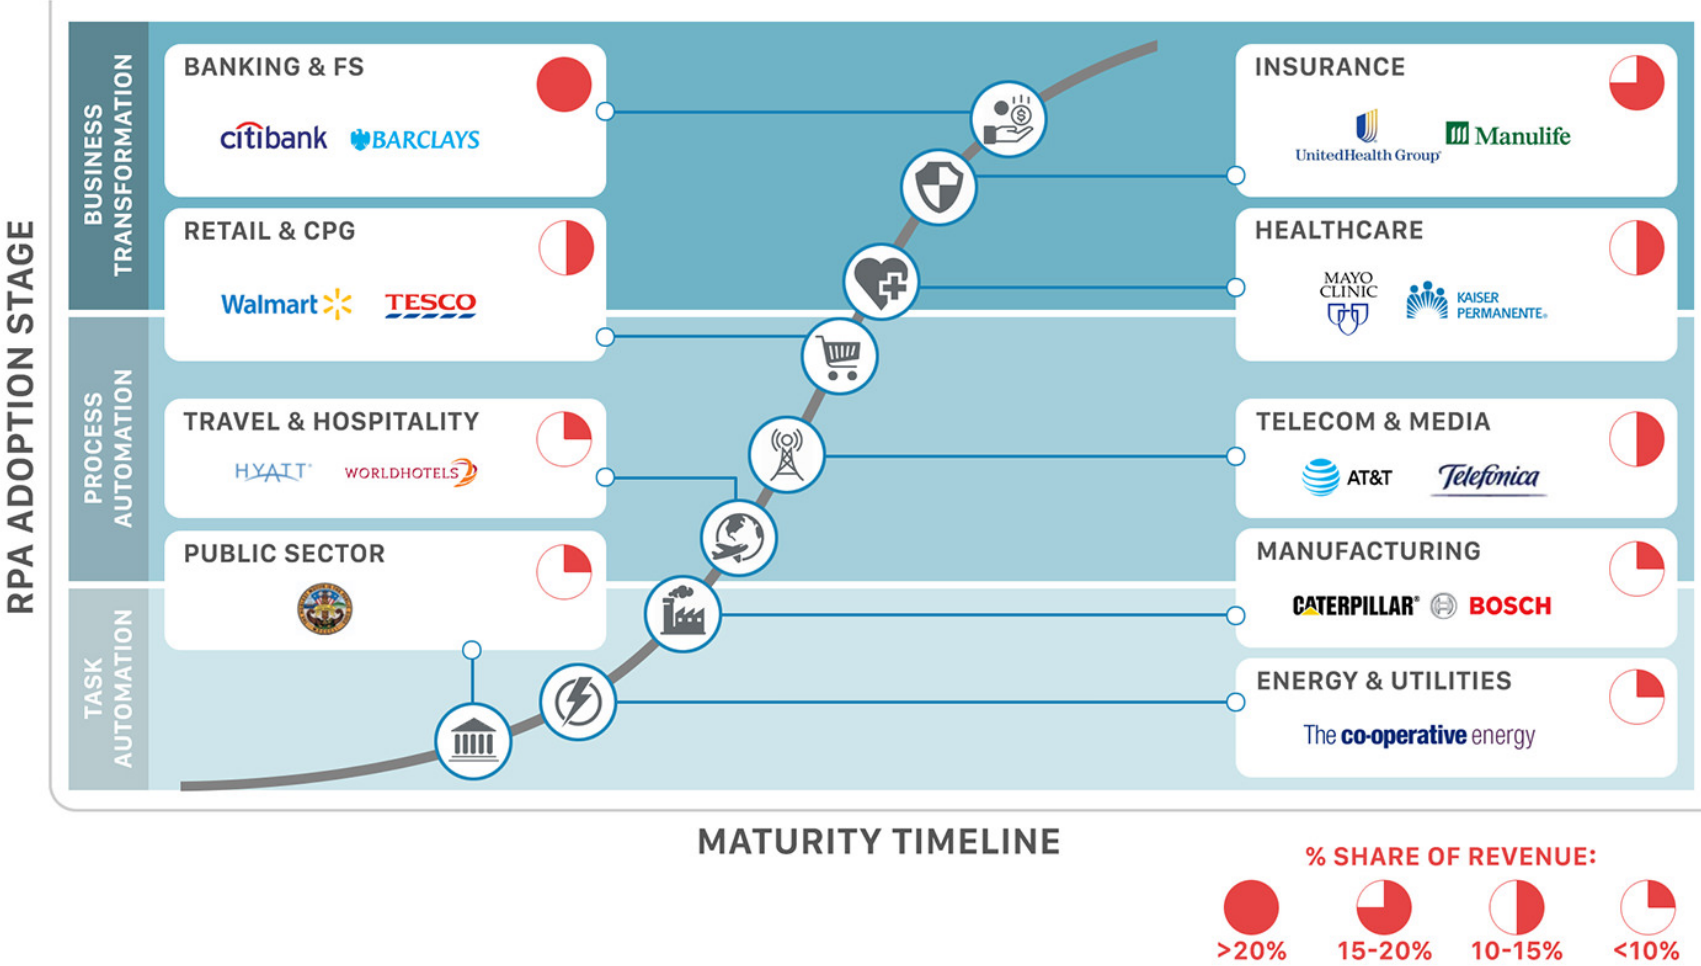

10

RPA space is set to explode, growing at a mammoth 37% over the next five years

5000+ Enterprises globally have already deployed RPA

Notes: 1 Defined as enterprise spend on proprietary RPA platforms, RPA assets developed in-house, and related in-house and outsourced RPA services, including bot configuration, management, deployment, support, and training
Source: Zinnov Research and Analysis

Companies have divergent approaches to make their platforms 'intelligent'

TRUE NATIVE

HEAVY RELIANCE ON NATIVE COGNITIVE CAPABILITIES

Smart Process Automation has **native OCR, AI and Analytics** capabilities

Low-code AutoML capabilities embedded in platform to reduce bot training time and effort

Limited reliance on partnerships for cognitive

NATIVE CAPABILITIES PLUS INTEGRATION WITH COMMERCIAL PLAYERS

IQ Bot has native AI capabilities and extensions to integrate with other AI platforms

Native NLP and Fuzzy Logic capabilities – multiple patents for AI/ML

Industry Partnerships:

- **Tech Giants:** Microsoft, Google, Amazon, etc.
- **Specialists Players:** ABBYY, Celonis, etc.
- **AI Start ups:** DataRobot, etc.

NATIVE CAPABILITIES PLUS INTEGRATION WITH COMMERCIAL PLAYERS

Digital Worker has native AI, NLP, and CV capabilities

Multiple patents for native AI/ML capabilities

Set up dedicated AI Labs

Industry Partnerships:

- **Tech Giants:** Microsoft, Google, Amazon, etc.
- **Specialists Players:** ABBYY, LoopAI, etc.
- **AI Start ups:** Expert System, etc.

PARTNERSHIPS-LED

HEAVY RELIANCE ON LEVERAGING COMMERCIAL PLAYERS FOR COGNITIVE

Less reliance on native AI/ML capabilities; expected to intensify focus

Launched Computer Vision offering for public preview; demo of in-built NLP in Together event in Shanghai

Extensive Industry Partnerships:

- **Tech Giants:** Microsoft, Google, Amazon, etc.
- **Specialists Players:** ABBYY, Humley, etc.
- **AI Start ups:** DataRobot, etc.

Developer ecosystem addressing the skill gap for RPA adoption

Several initiatives accelerating the growth RPA vendors

FREE (OR COMMUNITY) EDITIONS

Free edition of RPA Platforms being offered to SMBs, academia, developers and open source projects

Industry first to launch free RPA Express Starter in 2017

UiPath and Automation Anywhere both have Community Editions now

Plans to launch free edition of its RPA platform in H2 2019

BOT STORES (ONLINE MARKETPLACES)

Focus on online marketplaces for Ready-to-Deploy and Plug-and-Play Bots

All the big three RPA platforms announced their bot stores in 2018

800+ bots across the 3 bot stores

3,000+ bots downloaded (combined total) across the 3 bot stores

200+ partners (or service providers) building ready-to-deploy bots for the 3 bot stores

LEVERAGE OF UNIVERSITY RELATIONS & STUDENT COMMUNITY

250,000+ students enrolled in its **UiPath Academy** (free RPA learning resource), with target of training 500,000+ students by 2022

Partnership with educational institutions such as **University of Manchester** focused at RPA / Automation scenarios

NICE and Prof. Dan Ariely, professor of Psychology and Behavioral Economics at Duke University, have jointly released multiple thought leaderships for highlighting benefits of RPA

Zinnov Zones Framework for RPA Platform Selection

Zinnov evaluated participating RPA Platform companies on two key areas basis which they were plotted on a 2-dimensional graph

1 RPA PROWESS

2 RPA SCALABILITY

The cumulative score of enterprises based on RPA Prowess (x value) and RPA Scalability (y value) was used to classify platform companies in Zinnov Zones framework

RPA SCALABILITY

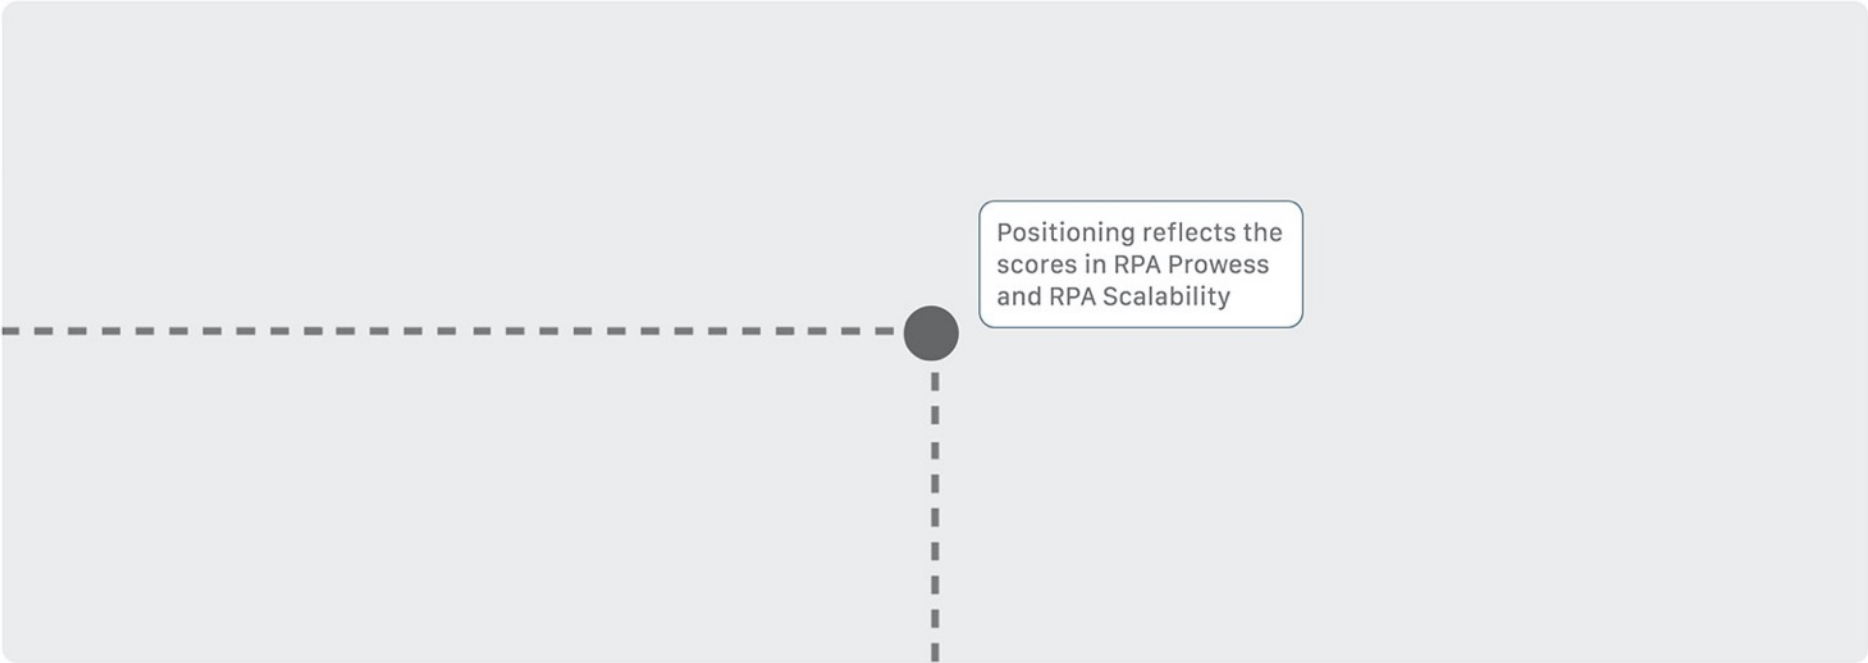

Financials

RPA Clientele

RPA Talent

Funding

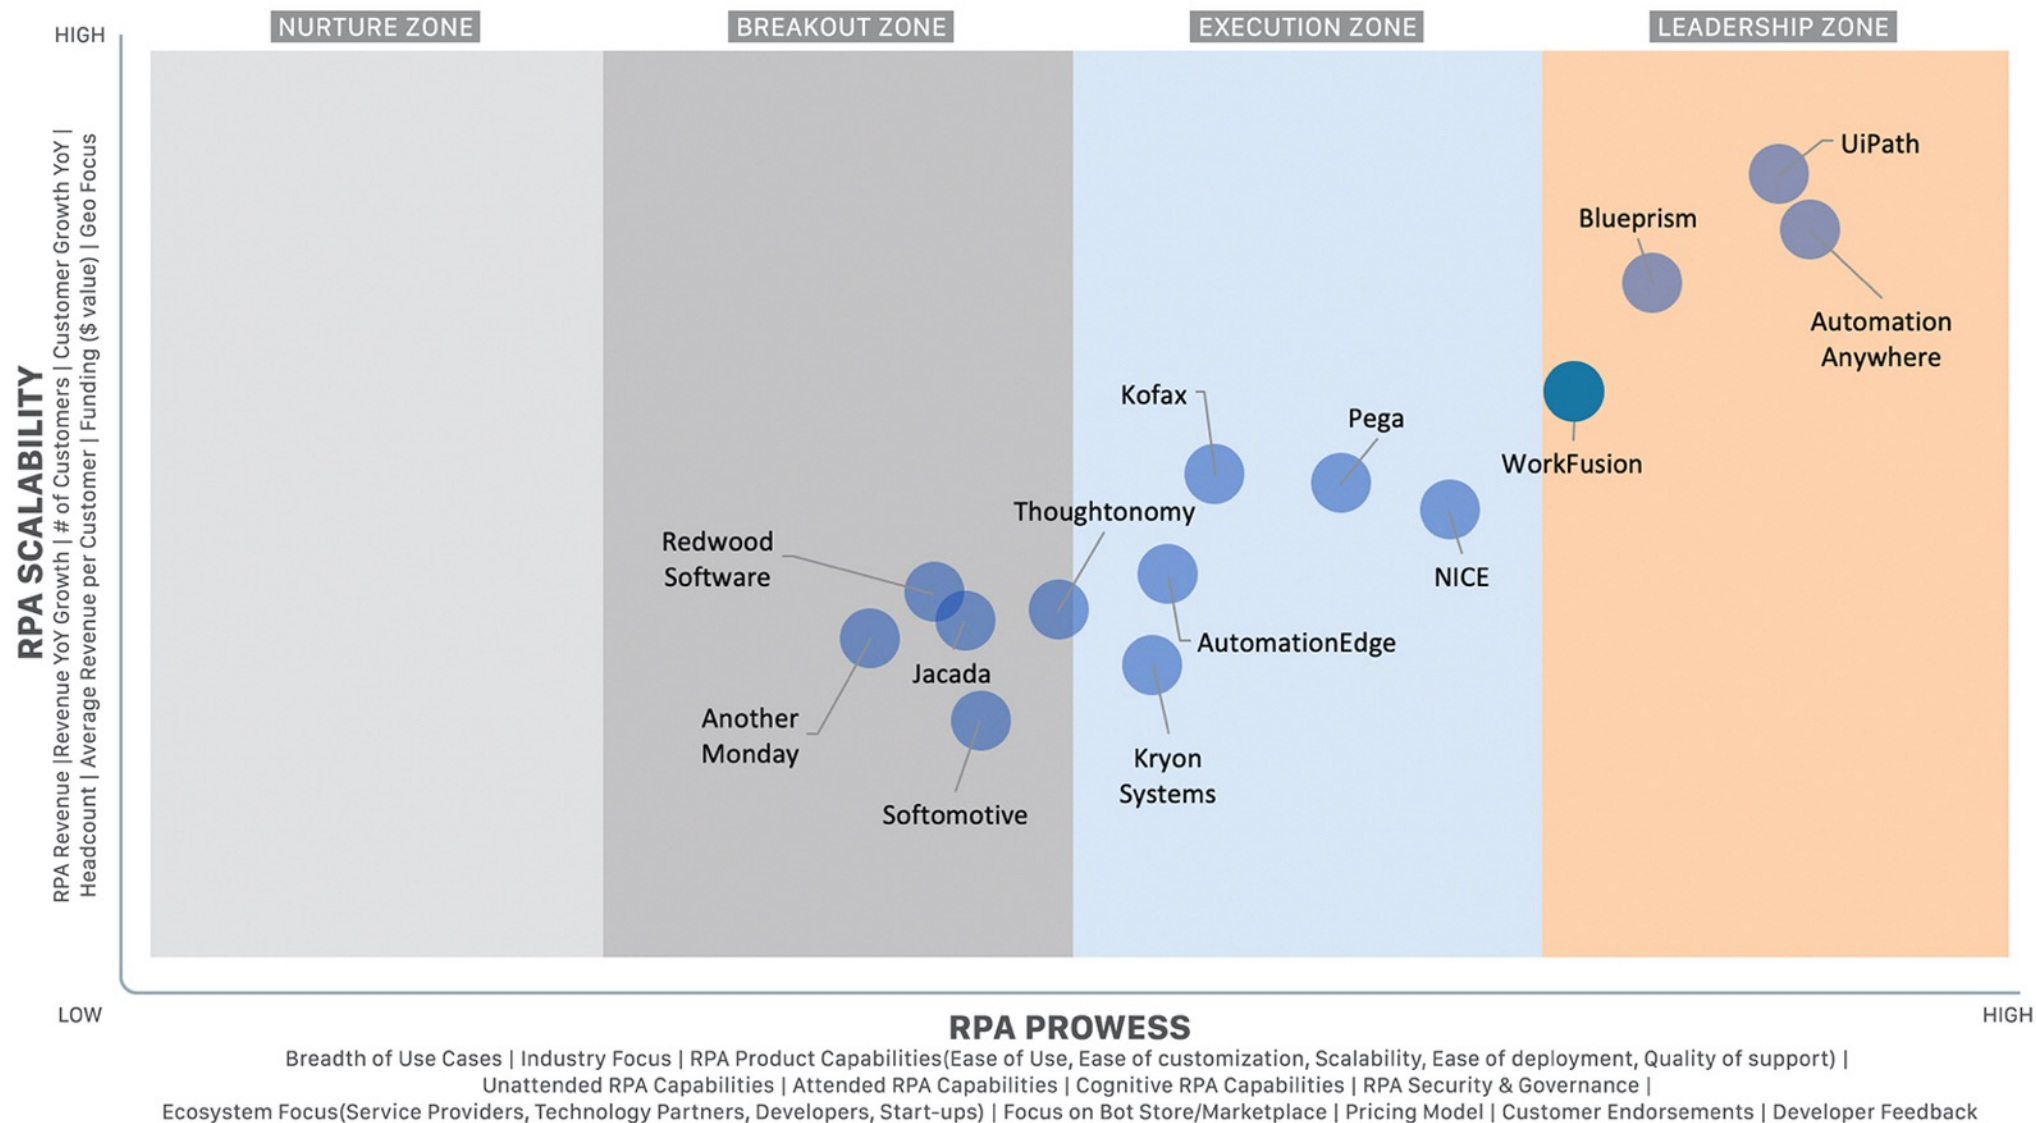

Geography Focus

RPA PROWESS

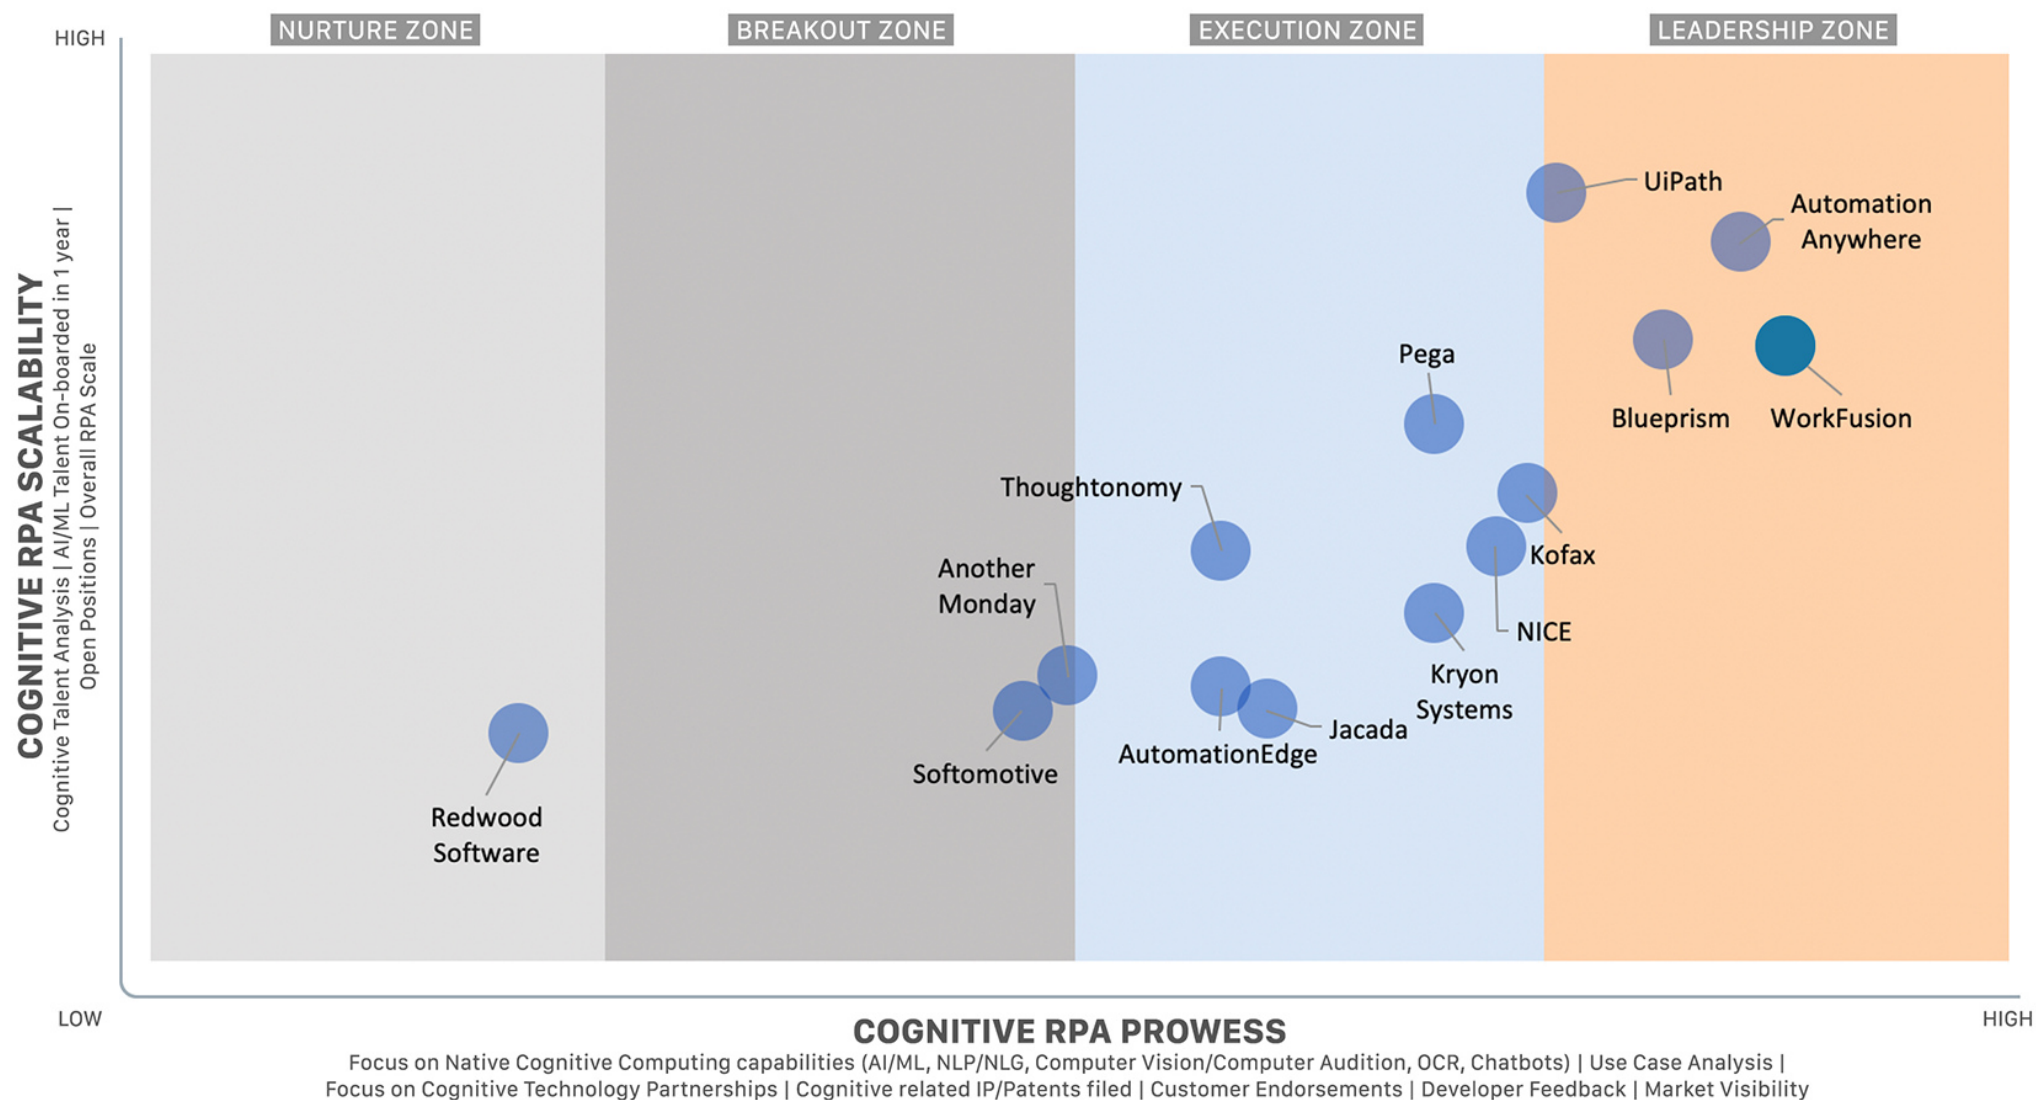

Breadth of Use Cases	RPA Product Capabilities	Attended RPA Capabilities	RPA Security & Governance	Focus on Bot Store	Customer Endorsements
Industry Focus	Unattended RPA Capabilities	Cognitive RPA Capabilities	Ecosystem Focus	Pricing Models	Developer Feedback

Zinnov Zones for RPA Platforms: Overall Ratings

Quotes by WorkFusion

“Our mission is to help businesses grow revenue, reduce costs and improve customer experience through intelligent automation. Many of the world’s leading companies are already deploying our technology and generating tremendous value...WorkFusion’s unified Intelligent Automation platform, the only solution that offers companies a truly viable path to large-scale, large-outcome intelligent automation.

Alex Lyashok
CEO
WorkFusion

“Our view on automation is focussed on the use cases rather than attended or unattended RPA. That said, our competitive edge is in the unattended RPA side as that provides us greater opportunities to include our cognitive capabilities, including AI/ML. Our low code ML is a differentiating factor as that can be trained on a very small sample size in a much smaller timeframe compared to other NLP tools offered by our competitors.

Marc Ache
CTO – Engineering
WorkFusion
